**Subject:** Microsoft Settlement

Legislators,

You will never arrive at a common decision acceptable to all parties. The American people supported the last settlement, but it was recently rejected by U.S. District Judge Motz. Microsoft would have given disadvantaged public schools more than \$1 billion in funding, software, services and training, and approximately 1 million Windows licenses for renovated PC's. Enact this settlement as supported by the majority of the American people. You will find no better way than to assist disadvantaged youth in uplifting and enhancing their education!!!

Government and the justice system have had more than their fair share of time and opportunity to arrive at a settlement. The American taxpayers are done footing the bill for this ongoing affair.

It's truly unfortunate that our country can unite when it's attacked, but we can't work out an internal conflict. We just drag it out a few more years until the related technology we're trying to incriminate is itself already obsolete. Give our economy and our people some respect, enact the previous settlement.

William F. Koranda
